WHITE CEMENT

## Lehigh White Masonry Cement

### LEHIGH WHITE MASONRY CEMENT

- Type S
- Type N

#### PRODUCT INFORMATION

Lehigh White Masonry Cement is a blend of white portland cement and finely ground white limestone, combined with process additions that enhance water retention, workability, boardlife and durability. Our masonry cement is manufactured to exacting standards to meet the ASTM C91 specification for Masonry Cements.

Lehigh White Masonry Cement is brighter, better-looking and more consistent. Combining it with clean white sand produces bright white mortar. When combined with colored sand and or pigments, masons can produce a wide a range of color schemes. Lehigh White Masonry Cement delivers unsurpassed design flexibility.

#### USE

When combined with 2 1/4 to 3 parts masonry sand per masonry mortar specification ASTM C270, Lehigh White Masonry Cement yields Type N or Type S mortars for masonry construction. Our cement is specifically formulated to produce white or colored mortars that are consistent and superior quality.

Mortar produced with masonry cement can be used in any application where masonry mortar is specified.

#### GREEN BUILDING

Concrete masonry is resilient to manmade and natural disasters protecting life and reducing the need to for new materials and rebuilding. It is durable, long lasting and requires little maintenance. Masonry materials can be recycled for other uses or be put to use in new masonry projects. Entire existing masonry buildings and structures can be reused for the ultimate in sustainable design.

#### AVAILABILITY

Lehigh White Masonry Cement is packaged in Florida, Georgia, Texas and Pennsylvania. It is widely distributed east of the Rocky Mountains. For technical assistance or more info on Lehigh White Cement products, visit us online at [www.lehighwhitecement.com](http://www.lehighwhitecement.com).
