

Lehigh White Portland Limestone Cement ASTM 1157 GU

LEHIGH WHITE PRODUCTS

- Portland Cement Type I
- Portland Cement Type II/V
- Portland Limestone Cement Type GU

Since 1897, the name Lehigh has meant quality in the cement industry. Lehigh White Cement is the foremost supplier of white cements in North America, and has a well-established reputation for high-performance products that encourage creativity and ensure longevity.

RESPONSIBLE

Using White Portland Limestone Cement (PLC), is an environmentally responsible choice. Production of this earth-friendly cement generates about 10% less CO₂ than other Portland Cements, while still delivering the consistency, versatility and performance Lehigh customers expect.

PERFORMANCE

Manufactured with the same care and attention as all our cements, Lehigh White PLC meets ASTM C1157 Standard Performance Specification for Hydraulic Cement, Type GU and outperforms competitors' Type I in concrete tests.

USE

Lehigh White Portland Limestone Cement can be used in almost any application where Portland Cement is normally used.

Lehigh White Portland Cement makes concrete brighter, better-looking and environmentally friendly, without sacrificing the quality and special attributes you expect from Lehigh White Cement.

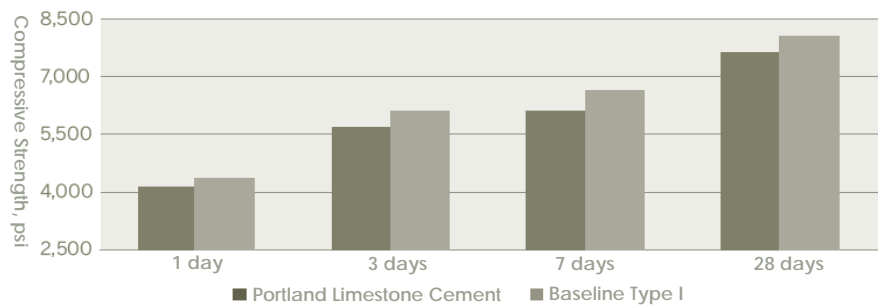

GREEN BUILDING

Portland Limestone Cement has been used internationally with great success for more than 25 years, and is now gaining popularity in North America with the increased emphasis on sustainable construction practices. Lehigh White Portland Limestone Cement allows for the production of a more sustainable concrete product for owners and designers who want a green option in architectural concrete products.

AVAILABILITY

Lehigh White Portland Limestone Cement is available throughout North America. For more information on Lehigh White Cement products or technical assistance, visit us online at www.lehighwhitecement.com or call 610.366.4600.

CONCRETE STRENGTH DATA

Lehigh White Cement Company / 7660 Imperial Way, Allentown, PA 18195

CAUTION Portland Limestone Cement when dry is non-hazardous. When in contact with moisture (such as in eyes or skin) or when mixed with water to make concrete, mortar or grout, it becomes highly caustic and will burn (as severely as third-degree) the eyes or skin. Inhalation of dry Portland Limestone Cement can irritate the upper respiratory system. For additional safety information, please reference our Material Safety Data Sheets available online at www.lehighwhitecement.com or phone 610.366.4600.
